Number Subsets: The Beginning

Unit 1: Extending the Number System

1. What is a number? Can you give me some examples?

2. What does it mean to classify something? When is it important to classify things?

3. How does something get placed into a specific classification? Please list some specifics with the items you mention here.

4. Is it possible for something to be identified into more than one classification group? If so, explain why you think so.
